REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art is not seen to teach or fairly suggest the use of the claimed immunomodulatory moieties in combination with a CpG dinucleotide for inducing immune responses in mammals. Applicants declaration filed on 8/15/2005 provides results showing that additional immunomodulatory moieties placed in various locations in the 3' or 5' direction respective to the CpG dinucleotide have increasing or decreasing immunomodulatory effects in comparison to the control which lacked the immunomodulatory moiety, and thus shows that these additional agents provide more effect than that of being a stabilizing moiety for the sequence in vivo. One of skill in the art would not have found it obvious to make the compounds in the instant claims and use them as applicants have done. Moreover, the examiner does not think undue experimentation would be required to practice the instant invention, as only routine experimentation would be required to determine which immunomodulatory moieties would have increased or reduced immunostimulatory effect when placed at various positions 3' or 5' of the CpG sequence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Traviss C. McIntosh whose telephone number is 571-272-0657. The examiner can normally be reached on M-F 9:30-6:00.
